SERVICING AUSTRALIAN INDUSTRY SINCE 1958

AG Holding is an Australian owned, family business that has serviced the Australian industry for over 60 years. We are expert manufacturing engineers who are passionate about local manufacturing and cater for one offs & small to large production runs. We have worked with some of Australia's most iconic companies bringing product concepts to life and reliably supplying high quality manufactured components & fabrications into Australian Industry.

Building our first factory in Highett, Victoria. 1958

Our state of the art factory in Carrum Downs, Victoria.

From our humble beginnings in a hand-built factory in Highett, we have grown to become industry leaders with a reputation for personability and commitment to excellence. Our firm values and continuous investment in equipment means that we stay ahead of the curve and produce high quality manufacturing solutions and have the ability to meet even the toughest schedules and stringent quality controls.

WHAT WE DO

Design

Our engineers can provide design & consultation utilising the latest suite of Solidworks 3D Software. Our expertise in manufacturing and our ability to work through design to manufacture stages with our customers will ensure your product is optimised and delivers best quality and performance results per application.

Fabrication

Our fabrication team are highly skilled professionals who take great pride in what they do ensuring all work completed is of the highest quality & finish. Flexible with ability to finish & supply to our customers requirements sees us a trusted supply partner

Laser Cutting

A combination of Fiber and CO2 laser cutting machines allows us to cut, engrave & etch almost all metals, plastics and wood. High Powered fiber laser fitted with automated loading/unloading allows us to process materials at world class speeds ensuring best value when processing your materials with AG

Welding

Our in house welding facilities are capable of welding small to medium products. We can cater for one offs, small to large production runs. MIG, TIG, Spot and Stud Welding are all available in house at AG Holding.

Folding / Bending

Our state-of-the-art CNC press brakes have a huge range of tooling to easily form even the most complex sheet metal components. Our bend quality and repeatability are why we are first choice for manufacturing complex light to medium parts.

Finishing

In-house ability to finish & deliver just in time ensuring a smooth and reliable supply chain. Material finish treatments such as powder coating can be offered in-house. We can also arrange other surface treatments such as polishing, galvanising, electroplating and painting as required.

DISCOVER OUR SERVICES

AG Holding has played small to large parts in bringing some of our customers dreams into reality. We work with our customers closely to achieve some spectacular results.

Aesthetic Fabrications

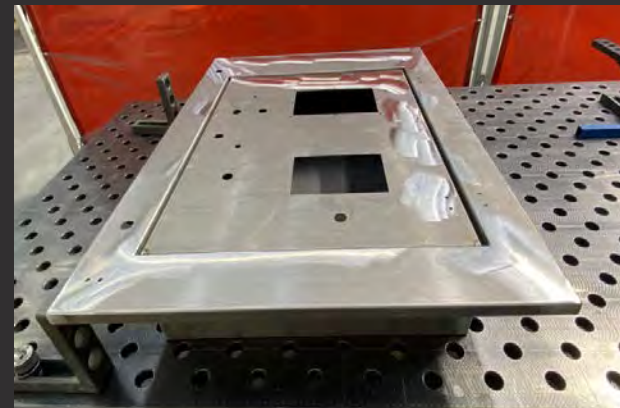

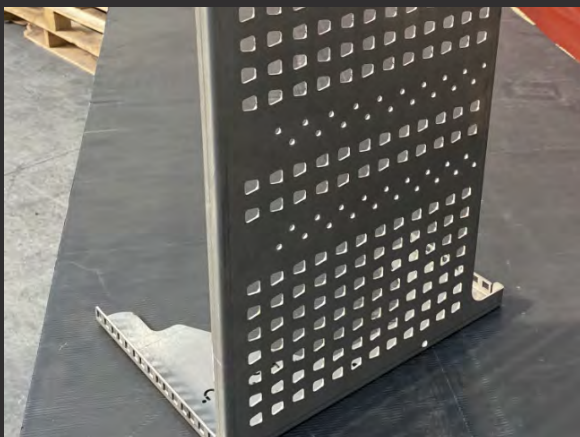

Technology and skills allow us to help you create visually appealing works from steel. Material types & material finishes are no problem for our team.

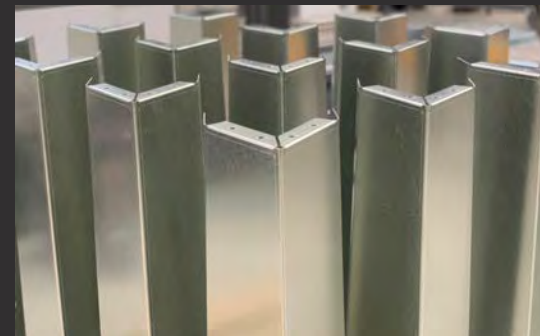

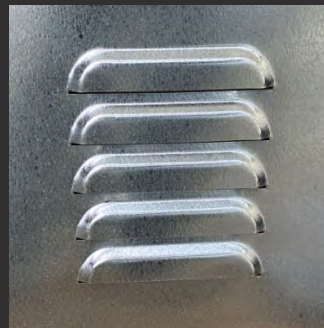

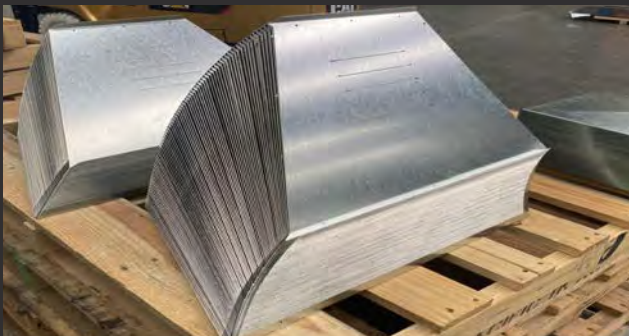

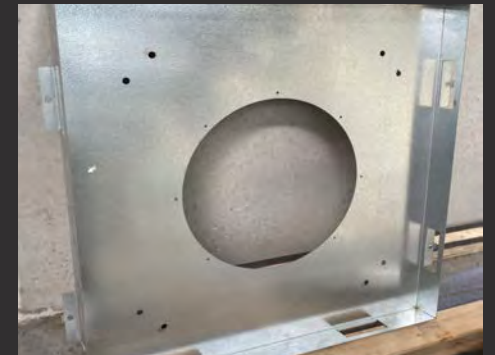

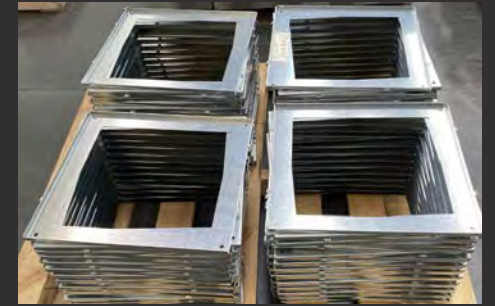

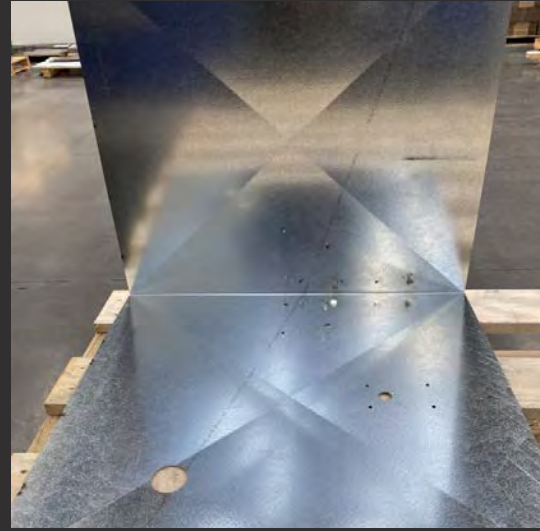

Industrial Fabrications

Investment in latest technology machinery, equipment & training allows us to produce high quality parts & fabrications from basic laser cut parts up to the most complex fabrication.

Industrial Fabrications

Simple to complex manufacturing. Full traceability on all manufacturing materials and components should give you the confidence to move forward with AG Holding.

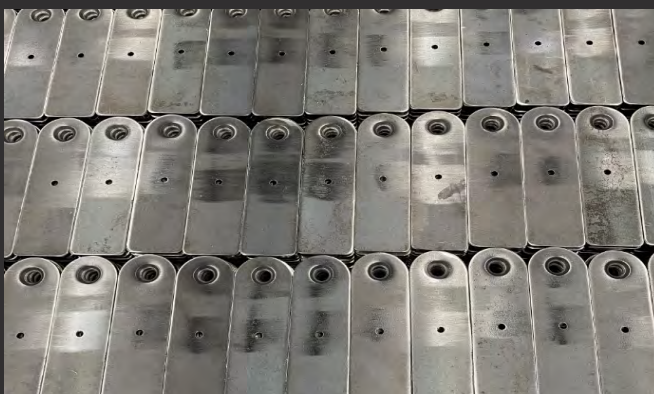

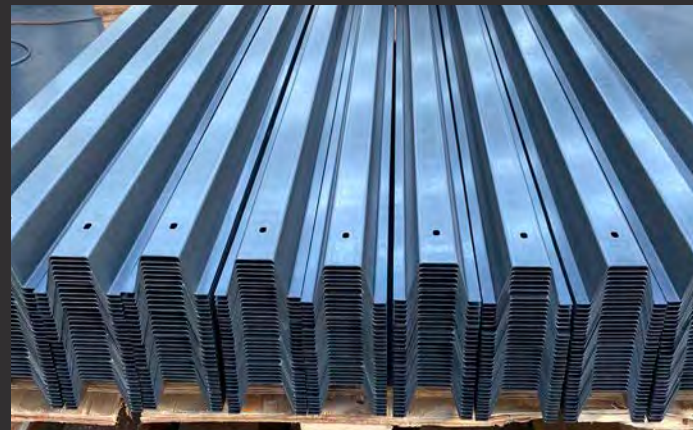

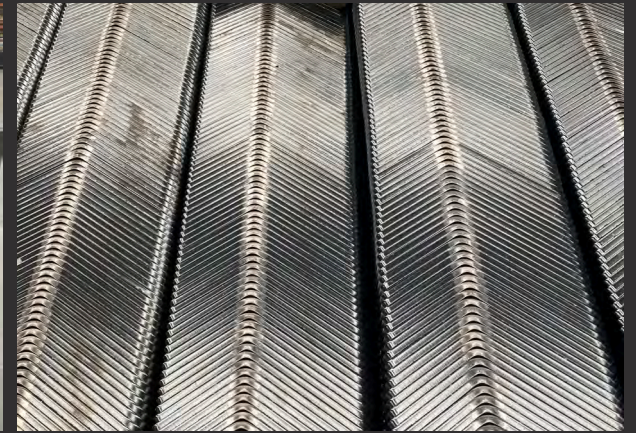

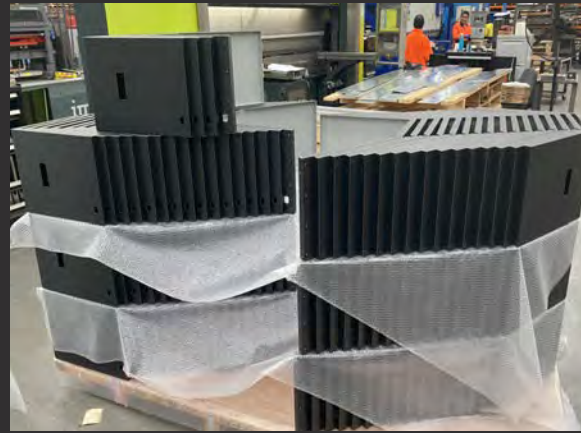

Contract Manufacturing

A supply partner who is renowned for reliability delivering products to meet even the most demanding production schedules and strictest quality control requirements.

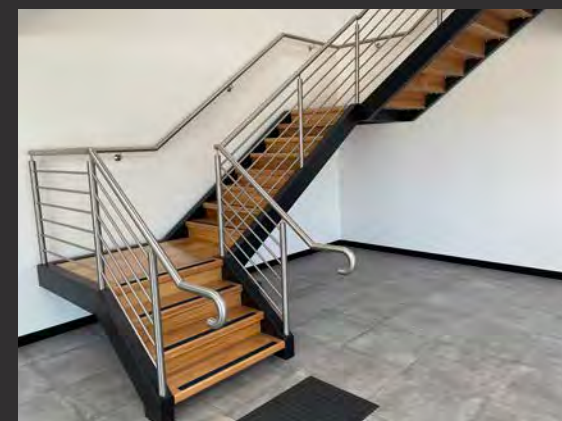

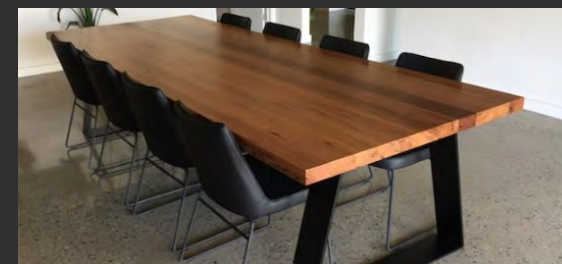

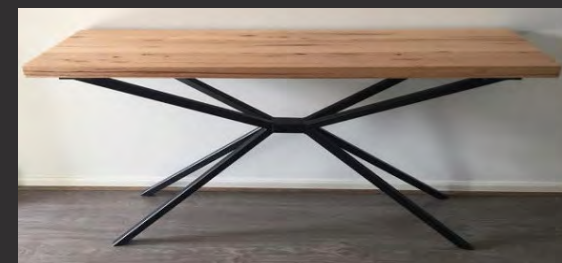

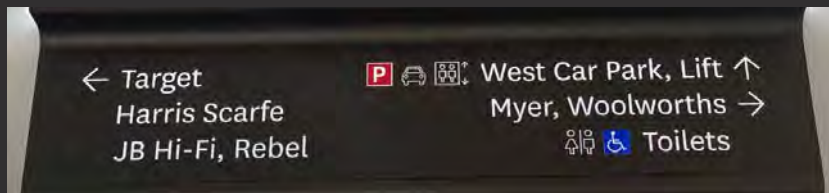

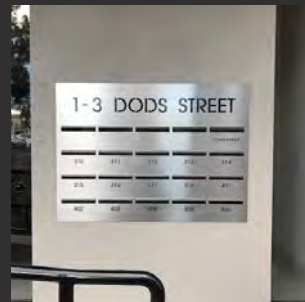

Commercial & Residential

We regularly work with builders and developers on residential and commercial steel work. We take time to understand the product and work with our customers to achieve the most practical manufacturable solution.
