

## ENVIROMENTAL POLICY

AG Holding pride ourselves on being a progressive company and our responsibility to society in the 21st century by ensuring all manufacturing and internal operations will be undertaken in an enviromentally responsible and sustainable manner to ensure everyones futures. We have already created policy to ensure all new machinery purchases fall in line with low power consumption machinery, we have installed 110kw Solar Power System on the roof of our new premises and will continue to look at new methods, procedures and technologies to reduce the impact of our production and office facilities on the enviroment.

We will ensure that our daily operations comply with all relavent Enviroment Protection Act 2017 and within our strict company enviromental policies.

As a leader in maufacturing and fabrication in Australia we are committed to:

- Complying with all Governemnt and Enviromental legislation obligations relevant to our products & activities.
- Adopting & promoting best manufacturing practice in all metalworks & production completed by AG Holding.
- Continually working at reducing the enviromental & carbon footprint AG Holding produces during operations.
- Promoting responsible use and management of power and water resources during operations performed by AG Holding
- Promoting enviromental awareness amongst our employees through continuous education and training.
- Ensure that sub-contractors and suppliers conform to relevant requirements of our Enviromental Management System

By adopting a proactive approach and consultive process we will:

- Ensure that prevention and emergency response measures are in place to protect our immediate surroundings.
- Continually reduce, re-use and recycle the materials used in all of our operations.
- Actively convert operations to the use of energy forms which reduce carbon emissions.
- Continually seek to increase the use of recyclable materials in our products and operations.
- Procurement preference to suppliers who follow progressive enviromental policies & responsibly source products.
- Create a culture which encourages staff to pioneer improvement of our companies enviromental performance.
- Maintain an Enviromental Management System in line with the requirements of International Standard ISO 14001
- To continually improve both the enviromental and safety management system in line with the latest scientific & technical knowledge, customer requirements, stake holders and public expectation
